## INITIAL UPGRADE

The V1 Design model is known as a smart choice for street driving and budget customers. It features 30 levels of damping adjustment and full length adjustment allowing a low ride height without compromising shock travel or ride comfort. We offer different types of top mounts for customers to choose from to meet their liking. Custom spring rate is also available for different purposes.

- 30 levels of damping adjustment
- Different types of top mounts available
- Spring rate selectable
- Completely rebuildable and individual parts are available separately for purchase
- 1 year manufacturer warranty

## FUN ON TRACK DAY

BC Racing's DR Coilover system is built with digressive valving offering the same great benefits of the BR Type model and is considered a perfect choice for those who are looking for track-oriented coilovers for occasional track days. The digressive valving offers more stability and enhances cornering ability at low shaft speed which gives you a different ride feel from the conventional linear valving.

- 30 levels of damping adjustment
- Double Digressive Valving
- Custom spring rate available
- 1 year manufacturer warranty

**Recommended For  
Track Use Only**
