The all-new BMW 4 Series Coupé now available in Singapore. A distinctive character with a sharper profile.

Singapore. BMW Asia and Performance Motors Limited today launched the all-new BMW 4 Series Coupé, a car that is more distinctive and sportier than ever. The overall vehicle concept behind the two-door car – from its proportions and bespoke design features to the model-specific chassis tuning – displays a rigorous commitment to a richly engaging driving experience. The spotlight on dynamic driving pleasure puts clear water between the all-new BMW 4 Series Coupé and the latest BMW 3 Series Sedan and gives it a significantly sharper character than its predecessor.

The all-new BMW 4 Series Coupé was developed with the aim of redefining the essence of driving pleasure in the premium midsize segment. Its aura of athleticism and exclusivity sees it following in the BMW brand's coupé tradition – shaped by a succession of legendary sporting machines – which now stretches back almost 90 years. The makeup of the all-new BMW 4 Series Coupé range reflects the emphasis placed on dynamic potency in the car's conception. The all-new BMW 4 Series Coupé is built at BMW Plant Dingolfing in Germany.

Exterior design: an exclusive blend of elegance and dynamism.

The appearance of the all-new BMW 4 Series Coupé brings both the familiar styling of BMW's sporty two-door models and the brand's new design language to the fore. A small number of crisp lines and the use of clear, generously sized surfaces come together into a body design which

exudes unadulterated driving pleasure from every angle.

The dynamically stretched proportions of the all-new BMW 4 Series Coupé are the result of greater exterior dimensions than its predecessor. Length has increased by 128 millimetres to 4,768 mm, width by 27 mm to 1,852 mm and the wheelbase by 41 mm to 2,851 millimetres. Vehicle height is up by just 6 mm, to 1,383 millimetres, making the car 57 millimetres lower than the new BMW 3 Series Sedan. Its tracks have increased in width over the previous-generation model's – by 28 millimetres at the front and 18 millimetres at the rear – and are also 23 millimetres wider than those of the latest BMW 3 Series Sedan.

An expressive and distinctive front end with a nose for tradition.

The striking front end of the all-new BMW 4 Series Coupé shines the spotlight on its standalone character. The large, vertically emphasised BMW kidney grille angles forwards and extends down almost to the lower edge of the front apron. Its standard air intakes have a mesh structure of the

sort only previously seen on M models. As a defining element of the front end, the grille stands

confidently at its centre. With its upright kidneys connected in the centre, it reprises a design feature from the company's past – one shared with legendary brand classics, such as the BMW 328 and BMW 3.0 CSi – and adds its own modern twist.

The slim headlights of the all-new BMW 4 Series Coupé reach well into the front wheel arches. Full-LED headlights are fitted as standard, while the BMW Laserlight is available as an option. This optional equipment item comes with the cornering light and adaptive cornering functions with variable road illumination optimised for urban and motorway driving. At speeds above 60 km/h, the laser high-beam increases maximum illumination range to 550 metres and follows the course of the road dynamically.

Elegant and dynamic side view, powerful rear.

The flanks of the all-new BMW 4 Series Coupé are shaped by precise and tautly carved surfaces. Short overhangs, slender pillars, long doors with frameless windows, the slim window graphic and a flowing roofline accentuate its elegant appearance. The glasshouse – heavily tapered in its rear

section – and muscular shoulders accentuate its powerful stature.

At the rear, too, large and distinct surfaces are the dominant influences. Slim and stylishly darkened full-LED rear lights with consistently illuminating light bars underscore the car's powerful looks.

Interior: driver-focused cockpit, two individual-style rear seats.

Cleanly designed surfaces, high-quality materials and the driver-focused layout of the cockpit define the premium ambience and singularly performance-centric interior design of the all-new BMW 4 Series Coupé. Sports seats and a newly designed sports leather steering wheel

come as standard. Together with the coordinated design of the instrument panel and door panel

trim, the high-set centre console generates an enveloping environment for the front seat occupants. The standard acoustic glass for the windscreen further improves comfort over long distances.

The instrument cluster and Control Display in the all-new BMW 4 Series Coupé form a large-surface display grouping. The start/stop button for the engine is now positioned in a classy control panel in the centre console. And the model-specific rear seats with integral head restraints and pronounced individual-seat character have been designed to accommodate two passengers.

Powerful yet efficient petrol engines in the all-new BMW 430i Coupé and all-new BMW 420i Coupé.

The all-new BMW 430i Coupé and all-new BMW 420i Coupé boast remarkably sporty performance characteristics and superior efficiency following an extensive upgrade of their respective four-cylinder petrol engines. The more powerful of the 2.0 litre pair generates a maximum output of 258 hp – an increase of 6 hp on the engine it replaces – and delivers peak torque of 400 Nm between 1,550 and 4,400 rpm. This enables the all-new BMW 430i Coupé to accelerate to 100 km/h from rest in 5.8 seconds.

The four-cylinder engine in the all-new BMW 420i Coupé is another shining example of efficiency and the free-revving performance associated with BMW power units. Its maximum output of 184 hp and peak torque of 300 Nm between 1,350 and 4,000 rpm translate into a 0 to 100 km/h time of 7.5 seconds.

Eight-speed Steptronic transmission as standard for all model variants, with the option of shift paddles and new Sprint function.

Globally, this is the first time that all model variants in the BMW 4 Series Coupé range have been fitted with an eight-speed Steptronic transmission as standard. The latest version of the automatic

transmission goes about its task of relaying drive torque from the engine with optimised shift characteristics and even greater efficiency.

In Singapore, the eight-speed Steptronic Sport transmission is fitted as standard for all model variants and offers even sharper shift dynamics and comes with shift paddles on the steering wheel. It also has the new Sprint function (standard on the all-new BMW 430i Coupé M Sport Pro), which adjusts the engine and shift characteristics to bring maximum dynamism to mid-range acceleration and overtaking manoeuvres with just a short pull of the 'minus' shift paddle.

Improved body rigidity and bespoke chassis tuning result in eye-catching dynamism.

Its model-specific proportions, optimised aerodynamic properties, increased body rigidity, a centre of gravity 21 millimetres lower than the new BMW 3 Series Sedan's, and careful tweaks to the chassis geometry, mounting and set-up, give the all-new BMW 4 Series Coupé a sporty character all

of its own. An intelligent material mix has been employed to optimise the weight of both the body and chassis technology. The bespoke body struts at the front end and in the rear axle area can also take credit for the car's superb handling agility and precision.

The M Sport suspension (standard on the all-new BMW 420i Coupé M Sport) incorporates specially tuned lift-related dampers while the Adaptive M suspension (standard on the all-new BMW 430i Coupé M Sport Pro) features electronically controlled dampers. Variable sport steering is included with both suspension variants. The all-new BMW 4 Series Coupé rides on 18-inch M light alloy wheels (all-new BMW 420i Coupé M Sport) and 19-inch BMW Individual Bicolour wheels (all-new BMW 430i Coupé M Sport Pro). The optional M Sport brakes are available with a choice of blue or red callipers. The BMW 430i Coupé M Sport Pro comes standard with red M Sport brakes.

The M Sport differential with electronically controlled, fully variable locking function in the rear differential is available as an option for the all-new BMW 430i Coupé in conjunction with the Adaptive M suspension.

Premiere: M Sport Pro for the ultimate in intense driving pleasure.

The design and equipment lines are also a clear reflection of the uncompromising focus on dynamic driving pleasure underpinning the overall vehicle concept. An M Sport model comes with features such as extra-large air intakes at the front and a prominently contoured rear apron, M Sport

suspension, M light-alloy wheels, and other specially designed interior elements. Exterior elements can also be specified in carbon fibre to add some motorsports flair with the M Carbon exterior package.

The M Sport Pro offered on a BMW model for the first time elevates driving pleasure intensity levels another notch. In Singapore, the all-new BMW 430i Coupé comes as standard with the M Sport Pro. It takes the features of the M Sport model and adds items including 19-inch wheels, a rear spoiler, a sporty soundtrack fed into the cabin and a Harman Kardon surround sound system. In addition to this, an extensive selection of M Performance Parts will also be available for customers to order.

Top-class customisation options.

A vast array of optional extras can be specified to inject an individual sense of style into the car and enhance driving comfort. The all-new BMW 420i Coupé M Sport comes as standard with Alcantara/Sensatec sports seats (leather Vernasca is optional) while the all-new BMW 430i Coupé M Sport Pro has leather Vernasca M Sport seats. All

front sports seats are electrically adjustable. Also to be found on the options list are BMW Individual interior trim strips of particularly exquisite quality, a Sensatec-trimmed instrument panel and a leather-covered BMW Individual instrument panel.

Three-zone automatic climate control and a Storage package come as standard in the all-new BMW 4 Series Coupé. An auxiliary heating system and ambient lighting including Welcome Light

Carpet are also standard. The tilting/sliding glass roof (standard on the all-new BMW 430i Coupé M Sport Pro) has a 24-millimetre-longer glass surface than on the outgoing model.

The rear backrest in the all-new BMW 4 Series Coupé has a 40 : 20 : 40 split as standard and its individual sections can be released and folded flat by pressing a button in the boot. The boot is able to hold 440 litres of gear.

Far wider choice of driver assistance systems.

A significantly broader selection of driver assistance systems compared to the preceding generation of the BMW 4 Series Coupé serves to boost comfort on long journeys and increase safety in situations where the driver does not have a clear view. Front collision warning with brake intervention, Lane Departure Warning including lane return (with steering assistance) and the Speed Limit Info system are all now included as standard. The optional Driving Assistant Professional adds a number of features including the Steering and Lane Control Assistant with new Active Navigation, which uses navigation data to detect any necessary lane changes.

The standard Parking Assistant now also features the Reversing Assistant, while the optional Parking Assistant Plus includes Surround View and Remote 3D View. The new-generation BMW Head-Up Display (standard on the all-new BMW 430i Coupé M Sport Pro) beams driving-related information onto a projection area enlarged by 70 per cent.

New digital services: BMW Intelligent Personal Assistant, smartphone integration, Remote Software Upgrade.

The standard fitted BMW Live Cockpit Professional features a fully digital screen grouping comprising a digital instrument cluster behind the steering wheel with a screen diagonal of 12.3 inches and a 10.25-inch Control Display. The fully digital instrument display in the cockpit provides enough room to accommodate an excerpt from

the navigation map, status indicators for the driver assistance systems or 3D visualisation of the surrounding area.

A built-in SIM card with 4G LTE connectivity and the standard Connected Package Professional make it possible to use digital services such as BMW TeleServices and Intelligent Emergency Call, Real Time Traffic Information with hazard warning, Remote Services and Concierge Services.

The driver and passengers will also benefit from the enhanced options for intuitive operation and the innovative digital services brought by the inclusion of BMW Operating System 7.0 in the all-new BMW 4 Series Coupé. Display content can be configured individually while the intuitive multimodal interaction between driver and vehicle can take place – depending on the situation – via the Control Display's touchscreen, the proven iDrive Controller, the multifunction buttons on the steering wheel or optional BMW gesture control. The BMW Intelligent Personal Assistant with added functions rounds up the suite of interaction with the vehicle, is at the customer's service as a standard feature in the all-new BMW 4 Series Coupé.

BMW Live Cockpit Professional also comes with optimised smartphone integration. Alongside wireless Apple CarPlay, the operating system for the all-new BMW 4 Series Coupé now also hosts wireless Android Auto. Remote Software Upgrade is another new feature that enables improved vehicle functions and additional digital services to be imported into the car over the air.

The BMW Digital Key for the iPhone will enable customers to just tap to unlock and easily get going by placing the iPhone in the smartphone tray and pushing the start button. Setup of the Digital Key can be done through the BMW Connected App. The car owner can also share access with up to five friends including a configurable car access option for young drivers which restricts top speed, horsepower, maximum radio volume and more. Management of access can be done from inside the car as well as through Apple Wallet.

The all-new BMW 4 Series Coupé is now available for viewing at the Performance Motors Limited showroom.

About Performance Motors Limited (PML)

Performance Motors Limited (PML) is a member of the Sime Darby Group and has been the dealer of BMW cars and BMW motorcycles in Singapore since 1979.

The PML showroom is located at 303 Alexandra Road, Singapore 159941.

Showroom opening hours are Monday to Saturday, 8am – 7pm; Sunday and Public Holiday, 10am – 6pm. For more enquiries, please call 1 800 2255 269.

PML has achieved various accolades in the area of sales achievement and service excellence in its 40-year history in the luxury segment.

2016 - PML recorded an all-time high for new car registrations and was named the 'Best Dealer in Sales – Importer Region B4' at BMW Group's Excellence in Sales Awards 2016. PML also won the 'Best Lifestyle Dealership' from BMW Group Asia. PML launched the Future Retail concept at the newly renovated BMW showroom at Sime Darby Performance Centre, which sets new standards in the automotive industry through the use of innovative digital tools and engaging retail environment. As a leading luxury car brand in Singapore, BMW remained the preferred limousine brand for the Singapore Airshow 2016, SMBC Singapore Open 2016 and Louis Vuitton High Jewellery Event 2016. BMW was also proudly designated as the limousine brand of choice for the Singapore Beach Polo Championship 2016, Singapore International Water Week 2016 and National Gallery Singapore Gala 2016.

2017 - PML continued to trailblaze and achieved yet another sterling record of high performance in a second consecutive year. PML was recognised at BMW Group's Excellence in Sales Awards 2017 as 'Best Retailer in Sales in the Importer Region Asia Pacific'. In addition, PML was accorded the 'Point Of Sales Award for Aftersales Marketing Excellence - Second Place' and 'Best Accessories Performance' awards by BMW Group Asia. The introduction of five new BMW iPerformance models and an updated BMW i model saw PML cementing its position as the industry leader for plug-in hybrid electric vehicles (PHEVs) and electric vehicles (EVs) in Singapore. BMW was appointed the official car brand for numerous high-profile events including ASEAN Tourism Forum 2017, SMBC Singapore Open 2017, Singapore Yacht Show 2017, IMDEX Asia 2017, Miss Universe Singapore 2017 and Singapore International Energy Week 2017.

2018 – In another record-breaking year of new car registrations, PML had for the first time surpassed the 5,000-unit mark. BMW cars also continued to be the favoured limousines for various prestigious events throughout the year, namely SMBC Singapore Open 2018, Singapore Airshow 2018, 32nd ASEAN Summit and Singapore International Film Festival 2018.

2019 – Celebrating its 40th year of distributing BMW Cars and Motorcycles in Singapore, PML achieves yet another outstanding milestone, winning the honour to be appointed the preferred limousine provider for International Maritime Conference & Exhibition for Defence (IMDEX Asia) 2019, Singapore Convention Week 2019 and Singapore International Energy Week (SIEW) 2019. In an exclusive industry first, PML partners Lazada to launch the new BMW 1 series. And for the first time, BMWFestSG was immersed in the heart of Orchard Road area, where a myriad of activities delivered sheer driving pleasure to visitors.
